About Me

Recent Computer Science graduate eager to begin a career in software development, specializing in Back-End and Front-End technologies. Strong proficiency in programming languages (including JavaScript and Java), database management (such as SQL and NoSQL), and algorithm design. Well-versed in best practices in coding and highly motivated to implement effective solutions to real-world challenges. Dedicated to continuous learning and capable of collaborating effectively in fast-paced environments, enhancing communication skills and contributing as a valuable team member. Excited to join a dynamic team to make a meaningful impact by delivering innovative solutions.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), HTML5, CSS3, Java
- **Frameworks:** React.js, Node.js, Express.js, Next.js (Basic), Material-UI, Tailwind CSS
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Version Control:** Git, GitHub
- **Other Tools:** VS Code, Postman, NPM, Yarn

EXPERIENCE

Full Stack Web Development in MERN　　　　　**Remote**
(Webstack Academy, Karnataka)　　　　　*Aug - Oct 2023*

- Created a dynamic food cart web application using the MERN stack, developing the frontend and integrating it with an existing backend.
- Implemented secure user authentication, integrated Stripe for payment processing, and used Mailtrap for password reset functionality.
- Managed a scalable MongoDB database for optimal data storage and retrieval performance.

PHP Full Stack Web Development　　　　　**Onsite**
(Enlightened Digital Marketing, Vapi, Gujarat)　　　　　*Jan - June 2024*

- Developed and launched over 3 websites using HTML, CSS, JavaScript, and PHP, adhering to best practices for responsive and dynamic user interfaces.
- Built user and admin dashboards for the "Geopresencetracker" application, featuring attendance tracking, user/admin authentication, task management, and GPS-based attendance functionalities.
- Utilized React.js, Tailwind CSS, PHP, WampServer, and MySQL for full-stack development and database management.
- Collaborated with a team member on the project, where Bala Krishna developed the payroll module and backend authentication system using PHP, emphasizing a collaborative approach.

Web Developer　　　　　**Remote**
(Zidio Development , Mumbai)　　　　　*Apr - June 2024*

- Built a Feedback Management System and Chat Application using MERN stack with role-based authentication.
- Developed an admin panel with MUI Data Grid for data management and Excel export, alongside a Material-UI-based user interface.
- Collaborated with Aniket Singh on frontend feedback form development in React.js.

Nodejs Developer　　　　　**Remote**
(Innobyte Services , Delhi)　　　　　*July - Aug 2024*

- Developed Node.js API for user authentication and profile management, including signup, login, and profile retrieval; integrated email confirmation with NodeMailer and documented setup and usage.

Front-end Developer　　　　　**Remote, Part-Time**
(Evandize)　　　　　*Oct 2024 - Present*

- Built dynamic event pages, implemented Google authentication, and optimized front-end cookie management.

PROJECTS

Auth App (Next.js, NeonDB (PostgreSQL), Prisma, ShadCN, Cloudinary)
- Developed a scalable authentication platform with Next.js and TypeScript, featuring multi-provider login options (Google, GitHub, credentials) and robust session handling using Auth.js and Prisma ORM.
- Enhanced user experience with profile image optimization through Cloudinary, and created a responsive, accessible UI leveraging ShadCN and Radix.
- **Demo Link**: https://auth-nextjs-dishant.vercel.app

QuizApp (React.js, Node.js, MongoDB, Material UI)
- Utilized a Trivia API to deliver a diverse range of questions across various topics.
- Implemented user authentication to enhance security and personalize the user experience.
- **Demo Link**: https://quizapp-dishant.vercel.app/

Blog WebApplication(React.js, Node.js, MongoDB, Cloudinary
- Implemented user authentication and validation for login and signup processes, allowing users to add, create, and edit posts with TinyMCE for rich text editing.
- Added a comment section for each post, enabling users to add, delete, update, and like comments, as well as reply to them. Integrated Cloudinary for image storage.
- **Demo Link** : https://blogapp-dishant.vercel.app/

Feedback management(React.js, Node.js, MongoDB ,Material UI, nodemailer)
- Built a feedback management system with separate admin and user interfaces, enabling feedback submission and management.
- Integrated JWT authentication, email verification, and Excel export functionality for efficient data handling.
- **Demo Link** : https://feedbackform-fronted.vercel.app/

Weather App(ReactJs, Tailwind CSS)
- Developed a responsive interface using Axios to fetch current weather data and forecasts from the Open Weather API.
- **Demo Link** : https://weatherapp-two-woad.vercel.app/

Landing Page(NextJs, Aceternity UI, Magic UI)
- Created a static landing page for a music course, emphasizing modern design and responsive layout.
- **Demo Link** : https://landingpage-with-next-js-bac8.vercel.app.
- **Demo Link** : https://page-mocha-psi.vercel.app/

Portfolio
- **Demo Link** : https://dishant12-portfolio.vercel.app/

EDUCATION

Bachelor of Engineering in Computer Science and Engineering   **Vadodara, Gujarat**
Babaria Institute of Technology   *2020-2024*
- CGPA 8.59
- CPI 8.6
